TOXICOLOGY

Volume contents

Volume 119 (1997)

Special Issue

FOURTH SUMMER SCHOOL IN IMMUNOTOXICOLOGY

October 18–20, 1995

Autoimmunity caused by xenobiotics
P.E. Bigazzi (USA) 1–21
Drug-induced autoimmunity: experience of the French Pharmacovigilance system
T. Vial, B. Nicolas, J. Descotes (France). 23–27
Animal models in autoimmune disease in immunotoxicity assessment
J.-C. Farine (Switzerland) 29–35
Current trends in drug-induced autoimmunity
J.P. Uetrecht (Canada) 37–43
The popliteal lymph node assay in 1996
J. Descotes, C. Patriarca, T. Vial, F. Verdier (France). 45–49
Autoantibodies in conventional toxicity testing
F. Verdier, C. Patriarca, J. Descotes (France). 51–58
Risk assessment for the harmful effects of immunotoxic agents on the immunological resistance to infectious diseases: ultraviolet light as an example
H. Van Loveren, W. Goettsch, W. Slob, J. Garssen (The Netherlands) 59–64
Mutant and transgenic mice in immunotoxicology: an introduction
M. Løvik (Norway) 65–76
Epitope mapping: a new method for biological evaluation and immunotoxicology
J.-M.R. Saint-Remy (Belgium). 77–81
Immunohistochemistry for light microscopy in safety evaluation of therapeutic agents: an overview
R. Burnett, Y. Guichard, E. Barale (France) 83–93
Issues with introducing new immunotoxicology methods into the safety assessment of pharmaceuticals
J.H. Dean (USA) 95–101

Skeletal changes in multiparous, nulliparous and ovariectomized mice fed either a nutrient-sufficient or -deficient
An attempt to develop an animal model of Itai-Itai disease
B.D. Whelton, D.P. Peterson, E.S. Moretti, H. Dare, M.H. Bhattacharyya (USA) 103–121
Kidney changes in multiparous, nulliparous and ovariectomized mice fed either a nutrient-sufficient or -deficient diet containing cadmium
Renal dysfunction apparently was not severe enough to produce full Itai-Itai disease
B.D. Whelton, D.P. Peterson, E.S. Moretti, R.W. Mauser, M.H. Bhattacharyya (USA) 123–140

Hepatic levels of cadmium, zinc and copper in multiparous, nulliparous and ovariectomized mice fed either a nutrient-sufficient or -deficient diet containing cadmium
With chronic exposure, translocation of Cd from kidney to liver occurs
B.D. Whelton, D.P. Peterson, E.S. Moretti, R.W. Mauser, M.H. Bhattacharyya (USA) 141–153
Lead may affect glucocorticoid signal transduction in cultured hepatoma cells through inhibition of protein kinase C
An interaction of lead with calcium-mediated cellular processes is demonstrated
L.E. Tonner, A.S. Heiman (USA). 155–166
In vitro paraoxon (E 600) exposure: no activating effect on human blood coagulation
There is no effect on fibrin monomer concentration in vitro
G. Petroianu, M. Toomes, W. Maleck, W. Bergler, R. Rüfer (Germany) 167–173

Announcement 175

Editorial note
K.J. Netter 177
Effect of thiols on cadmium-induced expression of metallothionein and other oxidant stress genes in rat lung epithelial cells
A study on redox regulation
Q. Gong, B.A. Hart (USA) 179–191
Effect of ethanol pretreatment on mercury distribution in organs of fetal guinea pigs following in utero exposure to mercury vapor
Fetal hepatic metallothionein protects against Hg crossing the placenta and may regulate Hg distribution in the fetus
M. Yoshida, H. Satoh, Y. Sumi (Japan) 193–201
Immunotoxicological effects of benzene inhalation in male Sprague–Dawley rats
No changes in thymus and spleen weight, B and T lymphocyte counts and humoral immunity were observed in rats exposed up to 200 ppm benzene for 6 hours/day, 5 days/week for 4 weeks
S.N. Robinson, R. Shah, B.A. Wong, V.A. Wong, G.M. Farris (USA) 203–213
Antimony-induced alterations in thiol homeostasis and adenine nucleotide status in cultured cardiac myocytes
ATP loss may be a secondary event to the other cellular changes induced by antimony
M.A. Tirmenstein, P.I. Mathias, J.E. Snawder, H.E. Wey, M. Toraason (USA) 215–223
Computational predictive programs (expert systems) in toxicology
Systems of electronic prediction of toxicity from chemical structures are compared
E. Benfenati, G. Gini (Italy) 225–237

Corrigendum 239
Announcement 241
Author Index. 243
Subject Index. 245–247
Volume Contents 249–250
